MAXON SMARTLINK® DS Intelligent Control Actuator Series

From the brand known for precision and performance.

One product.
More markets and applications.

Honeywell
Introducing the most versatile actuator in the industry.

The MAXON SMARTLINK® DS Intelligent Control Actuator Series is a heavy-duty quarter-turn actuator that offers unmatched flexibility for the broadest range of commercial and industrial process control applications. With thousands of possible configurations, the MAXON SMARTLINK® DS helps you serve more customers in more markets – all from the brand you trust for unparalleled accuracy and repeatability.
Superior durability
Rated for hazardous and harsh environments to ensure maximum consistency and uptime in a wide variety of climates and installations.

Highly configurable
Made-to-order for unique flow control needs, with standard features and options that make the MAXON SMARTLINK® DS ideal for a wide variety of applications – delivered with a short lead-time.

Intuitive interface
Industry-standard 4-20mA and Modbus communications capabilities, optional on-board display and plain-language menus make commissioning and trouble-shooting simple.

Proven precision
Field-tested reputation for delivering accuracy within 0.1° over a full 100° of rotation, optimizing system performance and reducing energy usage.
Flexible features

Serve more commercial and industrial customers with one series.

- **HIGH OR LOW TORQUE** – available in 300 in-lb (33Nm) or 900 in-lb (101Nm) and can rotate in a clockwise or counter-clockwise direction

- **HAZARDOUS LOCATION OR GENERAL PURPOSE APPROVALS** – MAXON SMARTLINK® DS can be ordered with or without a Class I Division 2 (CI-D2) hazardous location rating based on your application needs

- **AC OR DC POWER INPUTS** – choice of 110-240 AC or 24 VDC power, accessible via an easy-access compartment using standard wiring harness plugs

- **OPTIONAL BRAKE** – electronic brake limits shaft movement in the event of power loss or if the rated torque capability is exceeded, preventing system disruption and damage

- **OPTIONAL BACKLIT LCD DISPLAY** – on-board UV- and water-resistant display enables easy on-site commissioning and system monitoring

- **OPERATES IN ANY POSITION** – compact design allows actuator to be oriented in any plane

- **EXTENSIVE COUPLING OPTIONS** – can be integrated and shipped with a full line of butterfly and ball valves in a wide range of body and trim options (including iron, carbon steel, stainless steel and brass, and internal trim sets compatible with oxygen, natural gas, propane gas, digester gas, butane gas, coke oven gas, manufactured gas and landfill gas)

MAXON SMARTLINK® DS is well-suited for the following markets:

- OIL AND GAS
- CONTROL SYSTEMS MANUFACTURING
- AGRICULTURE
- CHEMICALS/PHARMACEUTICALS
- PULP AND PAPER

- AUTOMOTIVE
- METALS AND MINING
- FOOD AND BEVERAGE
- UTILITIES
Industry-leading precision and repeatability

Achieve optimal efficiency and reduced energy usage.

- **SUPERIOR POSITIONING ACCURACY** – 0.1° with a full travel span of 100° or a maximum of 1,000 position points over the full range of operation

- **PERMANENTLY LUBRICATED PLANETARY GEARS** – precision-machined from hardened alloy steels to minimize slip and hysteresis while requiring no maintenance

- **OVERHUNG SHAFT LOAD** – internal shaft can bear up to 750 lbs of side load torque, effectively driving linkage mechanisms without compromising precise positioning

---

**Reduce energy usage, increase cost savings**

When the MAXON SMARTLINK® DS is used for air-fuel ratio control, it can help reduce energy usage from 3-20%* — which can add up to big savings.

* Results will vary based on your company’s baseline performance.

---

Unparalleled durability

Get maximum consistency and system uptime.

- **ENCLOSURE RATINGS FOR FULL PROTECTION** – NEMA 4, NEMA 4X and IP67 ratings make the MAXON SMARTLINK® DS ideal for both indoor and outdoor installations, offering protection from hose-directed water, airborne dust contaminants, rain, ice, and moisture buildup

- **ALUMINUM HOUSING WITH POLYESTER POWDER-COATED FINISH** – offers superior impact, vibration and chemical resistance

- **WIDER RANGE OF TEMPERATURE TOLERANCES** – rated for -40° to +158°F (-40° to +70°C)**, enabling units to operate reliably in a variety of applications and regions

  ** Display temperature rating differs

- **LONG SERVICE LIFE MEANS LOWER COST OF OWNERSHIP** – 10 million repositions over a 10° span and 100 million repositions over the full 100° span
Enhanced communications interface
Integrate and commission more easily.

• **STANDARD COMMUNICATIONS PROTOCOLS** –
direct-wired 4-20mA and Modbus communications make it easy to integrate with programmable logic controllers (PLCs) and larger process systems; option to input position to actuator via 4-20mA and output via Modbus for return position confirmation and health monitoring

• **ON-BOARD DISPLAY** – two-line backlit display and input buttons enable fast, on-site commissioning right at the actuator

• **DUAL CONDUIT CONNECTIONS** – enables full wiring access for both high and low power and logic via two industry-standard national pipe thread (NPT) connections to eliminate line interference

Extensive built-in diagnostics
Prevent costly downtime and improve process efficiency.

• **EASILY ACCESSIBLE REAL-TIME AND HISTORICAL DATA** – via Modbus to view information on the display, via the PC-based software, or via the DCS connection to aid in preventive maintenance and enable more accurate decision making
  • Alarm and lockout data
  • Internal temperature
  • Motor current and voltage
  • Position feedback
  • Number of shaft repositions
  • Total degrees of shaft movement
  • RS-485 Modbus performance

• **MODBUS DIAGNOSTIC COUNTERS** –
help troubleshoot and verify Modbus communications commands

• **CONTINUOUS HEALTH MONITORING** –
alarm and lockout detection algorithms run every 50 milliseconds to ensure the system is performing optimally while tracking and maintaining a log of the data

FEATURE OPTIONS

- **Actuator Size With Brake Option**
  - 6" x 4.4" x 11.5" | 4" x 4.4" x 11.5" | 6" x 4.4" x 11.5" | 4" x 4.4" x 11.5"

- **Brake Functionality**
  - Brake is applied (de-energized) within 10 milliseconds of either event: 1) Loss of AC or DC input power is sensed
  - 2) Rated torque is exceeded and motor loss-of-synchronization is sensed

- **Display Option** - 2 x 16 Digit Backlit LCD
  - Actuator status, user commands, user settings, actuator history with full commissioning at the unit.
  - 2 LEDs to indicate manual mode (not controlled by 4-20mA inputs), and when alarm or lock-out condition exists.

- **Hazardous Location Ratings**
  - Non-incendive for Class I, Division 2, Groups A, B, C and D,
  - Dust-protected for Class II, III, Division 1 & 2, Groups E, F and G hazardous (classified) locations

- **Mounting Bracket Shaft Configuration Options**
  - ½" keyed output, linkage arm,
  - 1/2" square output,
  - 3/4" square output

- **Configuration Options**
  - Order as an actuator only: DS SA; actuator with valve mounting bracket: DS CA; actuator coupled with a butterfly valve: DS CV; actuator coupled with a ball valve: DS BV

AGENCY APPROVALS

- **Factory Mutual Global**
  - (File No. 3046182 & 3041711)
  - Non-incendive Class I, Division 2, Groups A, B, C and D;
  - Dust-ignition proof Class II, III, Division 1 & 2, Groups E, F and G Hazardous Locations; NEMA 4X and IP67
  - ANSI / ISA 61010-1 Safety Requirements for Electrical Equipment

- **Underwriters Laboratories, Inc. (File No. MH49631)**
  - UL 353 - Standard for Safety for Limit Controls
  - UL 998 - Standard for Safety, Software in Programmable Components

- **MAXON - Self Declaration**
  - Compliance with European CE requirements defined by:
    - EMC Directive 2004/108/EC
    - Low Voltage Directive 2006/95/EC
